

The state-edit prompt used for pier-leaving-edit.png

Use the attached image as the exact base. Same pier, same camera position, same blue-hour light, same rain, same lamp, same captain. The only change: the ferry has pulled away from the pier and is now small, mid-harbour, with a white wake behind it. Do not change anything else.

The supplied edit is a SIMULATED stand-in for what a model returned. Run verify before accepting it: "do not change anything else" is a request, not a guarantee.
