

AI-generated classroom reference

retail-adults-reference.png was generated with OpenAI image generation for this course on 6 September 2026 (see courseware/assets/imagegen-provenance.json). It shows fictional adults; it is not a photograph of real people. It is copied unchanged and used as a one-image POSITIVE CONTROL for the detectors: a single synthetic image cannot establish real-world accuracy. The face and person boxes in data/positive-control-truth.json were annotated manually and are approximate. Keep this note with the file.
